DETAILED ACTION

Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 12-17, and 23-28, drawn to a digital camera offering several captured images to the user to select from before storing in memory, classified in class 348, subclass 333.05.
 - II. Claims 7-11, 18-22, and 29-33, drawn to a digital camera automatically selecting the best of several captured images before storing in memory, classified in class 348, subclass 230.
2. The inventions are distinct, each from the other because inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in a system that does not offer automatic image evaluation as defined in claims 7-11, 18-22, and 29-33. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
